Providing Full-Service Environmental Solutions

CHOOSING A SPILL CLEANUP COMPANY

Ask Yourself...

- If required to have an SPCC Plan, is it up to date?
- Does my SPCC Plan name an emergency response provider?
- Does the emergency response provider know that they are named in my SPCC?
- Do I have a contract in place to include terms and conditions, liability protection, insurance information, and pricing?

Considerations

- Research ER providers in the area.
- Check references.
- Perform an audit.
 - Training records.
 - Equipment and PPE reasonably accessible.
 - Twenty four hour live phone coverage.
- Negotiate a service agreement/contract to include pricing.
- Waste management.

Prepare

- Choose a primary vendor and a backup.
- Invite vendor(s) to facility to develop relationship and allow vendor to become familiar with the facility.
- Perform table top spill drill on routine basis.
- Provide vendor(s) with SDSs, plant map, and decision maker contact list.
- Introduce vendor to plant ER team.
- Train employees.

Scope, Schedule, Budget

- Spills can't be predicted, but planning for them is critical.
- Include spill responder(s) in all facets of spill response planning.

Who we are

- Incorporated in 1992
- Joined The RossWay Group® of companies in 2015
- Headquartered in High Point, NC
- Five Core Services
 - Remediation
 - Waste Management
 - Industrial Services
 - Transportation
 - Environmental Spill Response

Service Locations

- High Point, NC
- Burlington, NC
- Columbia, SC
- Greenville, SC
- Atlanta, GA
- Macon, GA
